
MALAKAR'S DESCENT

The Complete Player's Guide

Mechanics, Strategies, and Appendices

You are Malakar, a necromancer of singular ambition. The city of Brooklynia stands between you and total dominion over the known world. This guide covers every mechanic, formula, and strategic consideration you will need to ascend from a single shambling zombie to the conqueror of Hope herself.

Malakar's Descent is an idle/incremental game. Progress continues while the app is closed, up to a 4-hour offline cap. The game saves automatically every 30 ticks and on most significant actions.

APPENDICES

- A. Grimoire Skills Full Reference
- B. Tower Floors Reference
- C. Raid Targets & Narrative Events
- D. Boss Roster
- E. Quest Reference

1. GETTING STARTED

Malakar's Descent begins the moment you raise your first zombie. From that single undead servant, your entire empire will grow. The early game is about understanding the three resources and building army momentum before your first Dark Ascension.

The Interface

- **Top Bar:** Soul Essence (SE), Dark Mana (DM), Corpse Matter (CM), Level (Lvl), Multiplier (X), and Tome Upgrade Points (TUP).
- **Army Row:** Current / Cap counts for each unit type.
- **Tomes Row:** Current / Cap counts for Binding and Sight tomes.
- **Activity Bars:** Live progress bars for active Raid, Tower build, and active Curse.
- **Tab Row:** Event Log, Tower, Stats, Info (top row). Raids, Grimoire Codex, Quests (bottom row).
- **Nav Bar:** Six icons for action panels -- Undead, Tomes, Hex (Curses), Shrine (Ascension), Swords (Raids/Bosses), Shop.

First Steps

- Open the **Undead panel** (skull icon). Raise zombies with SE.
- Open the **Tomes panel** (book icon). Buy a Tome of Sight as soon as you have 250 DM. This is the single most important early purchase.
- Study regularly (50 DM each) to increase your permanent DM generation.
- Begin saving for your first Dark Ascension at 1,000,000 SE.

Tomes NEVER reset on Ascension. Every tome you buy is a permanent investment. Prioritise tomes early.

2. RESOURCES

Soul Essence (SE)

The primary currency of conquest. Generated by your undead army each game tick (90 seconds). Spent on units, ascension, and raid costs. There is no cap on SE.

- Zombies: $(1 + \text{tomeBinding} \times 0.05)$ SE each per tick. Relentless Horde adds +0.5 to this.
- Ghouls: 5 SE each per tick.
- Golems: 20 SE each per tick (30 with Ironbound Titan when $\text{SE} \geq 80\%$ of ascension cost).
- Wraiths: 50.2 SE each per tick (requires Army of Darkness).
- All SE is then multiplied by your **Permanent Multiplier** (starts at 1.0, increases +0.1 per Ascension).

Active spells: Feast of Souls doubles SE. Ruinous Ambition also doubles SE but halves DM.

Dark Mana (DM)

The resource of knowledge. Slower to accumulate than SE but essential for tomes, grimoire skills, curses, and Study upgrades. No cap.

- Tome of Sight: 1 DM per tick each.
- Study upgrades: each Study purchase adds +0.05 DM/tick permanently (cost: 50 DM each).
- Tower Floor 2 (Shadowed Vaults): +10% DM generation.
- Tower Floor 5 (The Black Pinnacle): +10% all production including DM.
- Sacrifice: Essence Channeling (Tier 2 Grimoire): +20% DM, sacrifices all ghouls.

Ruinous Ambition halves DM generation while active. Plan accordingly.

Corpse Matter (CM)

The rarest resource. Required for grimoire skills, some raid scenarios, and advanced progression. Accumulates slowly from multiple probabilistic and deterministic sources.

- Base: 2% chance per tick to gain 1 CM (tick-based probability roll).
- Ghouls: +0.001 CM per ghoul per tick.
- Golems: +0.01 CM per golem per tick.
- Corpse Reavers (Tier 1 Grimoire): 15% chance per tick to generate 1 CM.
- Bone Fortress (Tier 3): +1 CM per golem per tick.
- Titanic Regeneration (Tier 4): +2 CM per golem per tick.
- Wraiths (Army of Darkness): +0.02 CM per wraith per tick.
- Tower Floor 3 (Ebon Spire): 5% chance per tick for +1 CM.
- Tower Floor 5: +10% all production including CM.
- Corpse Gratification curse: instantly grants +10 CM (750 DM + 10,000 SE, 300s cooldown).

Tome Upgrade Points (TUP)

Earned from quests and boss battles. Spent exclusively in the Dark Library to increase tome caps. Each cap upgrade costs 1 TUP and raises either the Binding or Sight tome cap by 1.

3. YOUR ARMY

Your army is the engine of production and the instrument of conquest. Each unit type serves a different role. All units can substitute in tower builds via the Wraith Equivalency system.

Zombies

- Cost: 10 SE each.
- Production: $(1 + \text{tomeBinding} \times 0.05)$ SE/tick each.
- Transcendent Command multiplies cap by 1.5x. Relentless Horde multiplies cap by 1.25x.
- With Sacrifice: Ravenous Spirit active, zombies are sacrificed and cannot be raised. All SE production shifts to a flat +10% bonus.

Ghouls

- Cost: 100 SE + 10 DM each.
- Production: 5 SE/tick + 0.001 CM/tick each.
- Transcendent Command multiplies cap by 1.5x.
- With Sacrifice: Essence Channeling active, ghouls are sacrificed and cannot be raised. DM generation gains +20%.

Golems

- Cost: 1,000 SE + 50 DM each.
- Production: 20 SE/tick + 0.01 CM/tick each (30 SE with Ironbound Titan when near ascension threshold).
- Transcendent Command multiplies cap by 1.5x.
- Bone Fortress adds +1 CM/tick per golem. Titanic Regeneration adds +2 CM/tick per golem.
- With Sacrifice: Critical Dominion active, golems are sacrificed. Raid rewards +35% but retaliation +10%.

Wraiths

- Cost: 5,000 SE + 100 DM each. Requires Army of Darkness (Tier 4 Grimoire skill).
- Production: 50.2 SE/tick + 0.02 CM/tick each.
- In tower builds, 1 Wraith counts as 20 Zombies, 4 Ghouls, or 2 Golems for requirement checks.

Unit Caps by Level — Summary

Unit caps grow significantly with each ascension level. Tomes and grimoire skills further extend what your army can hold.

Raise All Undead

The Raise All button purchases as many of each unit type as you can afford simultaneously, filling all caps in one tap. Highly efficient for batch purchasing after a period of offline accumulation.

4. TOMES & THE DARK LIBRARY

Tome of Binding

- Cost: 100 DM each.
- Effect: +15 Zombie cap, +8 Ghoul cap per tome owned. Each tome also increases zombie SE production by 0.05/tick.
- Starting cap: 75. Expandable via Dark Library (1 TUP per +1 cap).

Binding tomes are your zombie engine. The SE bonus compounds multiplicatively with army size.

Tome of Sight

- Cost: 250 DM each.
- Effect: +4 Golem cap per tome. Each tome generates 1 DM/tick directly.
- Starting cap: 75. Expandable via Dark Library (1 TUP per +1 cap).

Buy Tomes of Sight as early as possible. The DM generation compounds, making every subsequent tome purchase faster.

Study

- Cost: 50 DM.
- Effect: Permanently increases DM base generation by +0.05/tick.
- No cap on Study upgrades. Resets to 0 on Ascension (but tome DM generation persists).

The Dark Library

Unlocked when both tome caps are full. Spend TUP (1 TUP per upgrade) to increase Binding or Sight tome caps by 1, allowing you to purchase additional tomes beyond the starting 75.

Tome Overcap Bonus

When your combined tome total (Binding + Sight) exceeds 150, every additional 5 tomes multiplies SE production by 1.25x. This stacks multiplicatively:

- 155 tomes: 1.25x SE
- 160 tomes: 1.56x SE
- 170 tomes: 2.44x SE
- 180 tomes: 3.81x SE
- 200 tomes: 9.31x SE

This bonus only activates after both caps are saturated. It is the primary late-game SE scaling mechanism.

5. DARK ASCENSION

Dark Ascension is the core progression loop. Spend accumulated Soul Essence to permanently increase your power. Each ascension raises your necromancy level and increases your permanent SE multiplier by 10%.

Cost

The first Ascension costs 1,000,000 SE. Each subsequent level costs approximately 1.5x more than the last, so costs escalate steadily but never astronomically.

What Resets on Ascension

- Soul Essence (spent on the ascension itself)
- Dark Mana, Corpse Matter
- Army (all units reset to 1 zombie unless Eternal Legion is active)
- Study bonus
- Active spells and cooldowns

What NEVER Resets

- Tomes (Binding and Sight) and their caps
- Permanent Multiplier (it increases each ascension)
- Grimoire skills
- TUP and Dark Library upgrades
- Lifetime statistics

Level 20 — Grimoire Prestige

Reaching Level 20 is a special milestone. The game pauses automatically and the Grimoire modal opens, requiring you to choose and confirm a prestige before play resumes. See Chapter 10 for full details.

Unlock Events by Level

- Level 2: Feast of Souls curse unlocked.
- Level 5: Rival Necromancer narrative raid becomes eligible.
- Level 8: Corpse Gratification curse unlocked.
- Level 10: Terror Raids unlocked.
- Level 15: Ruinous Ambition curse unlocked.
- Level 20: Grimoire Prestige forced (game pauses until confirmed).

Tower floors also have level gates: Floor 1 = Lv1, Floor 2 = Lv3, Floor 3 = Lv6, Floor 4 = Lv8, Floor 5 = Lv10.

6. THE BLACK TOWER

The Black Tower is a permanent structure built across your runs. Each floor provides powerful production bonuses and remains built even after Grimoire Prestige. Floors require both resources and army strength minimums to build.

Building Floors

- Floors must be built in order (1 through 5).
- Each floor has a build time (90s to 480s) during which the army is committed.
- Each floor has a failure chance (15% to 35%). Exceeding army requirements reduces failure chance by 1% per 10% excess army, floored at 5%.
- On failure, resources are lost but army is retained. Retry immediately.

Stack excess army before building higher floors to minimize failure chance. Having 2x the required units is often worth the wait.

Floor Bonuses

- **Floor 1 — Obsidian Foundation:** +5% SE production.
- **Floor 2 — Shadowed Vaults:** +10% DM generation.
- **Floor 3 — Ebon Spire:** 5% chance per tick for +1 CM.
- **Floor 4 — Battlements of Night:** -10% raid retaliation.
- **Floor 5 — The Black Pinnacle:** +10% ALL production (SE, DM, CM).

All five floors are permanent. Once built they are never destroyed regardless of prestige or ascension.

Army Requirements

Full army requirements and build times are shown in the Tower tab when each floor becomes eligible.

7. CURSES

Curses are powerful temporary abilities that unlock as you ascend. Only one can be active at a time. When active, the curse button shows a colored wipe cooldown indicator draining left to right.

Feast of Souls

- Unlocks: Level 2 (Level 3 in some runs).
- Cost: 100 DM.
- Effect: SE production x2 for 60 seconds.
- Cooldown: Duration-based (no separate cooldown after expiry -- can be recast immediately).
- Indicator: Gold/orange wipe.

Use Feast of Souls right before a manual Raise All sweep to maximise the burst. SE earned during the double-production window is permanent.

Corpse Gratification

- Unlocks: Level 8.
- Cost: 750 DM + 10,000 SE.
- Effect: Instantly grants +10 Corpse Matter.
- Cooldown: 300 seconds (5 minutes).
- Indicator: Purple wipe.

CM is the bottleneck resource for Grimoire skills. Use Corpse Gratification whenever it comes off cooldown.

Ruinous Ambition

- Unlocks: Level 15.
- Cost: 250 DM.
- Effect: SE production x2 AND DM generation x0.5 for 5 minutes (300 seconds).
- Cooldown: 600 seconds (10 minutes) after expiry.
- Indicator: Red wipe.

Do not use Ruinous Ambition when you need DM urgently (e.g. about to purchase a tome or grimoire skill). Plan around the 10-minute cooldown.

8. TERROR RAIDS

Unlocked at Level 10. Send your army to pillage targets across Brooklynia. Raids run in real time and generate resources on completion. Each raid carries a retaliation risk that scales with your raid level and target choice.

Standard Raids

- **Village:** 4.5% retaliation, 90s duration, 300x army strength SE reward.
- **Graveyard:** 2.7% retaliation, 60s duration, 20x CM reward + 5-14 bonus zombies.
- **Monastery:** 13.5% retaliation, 120s duration, 150x DM reward.
- **Castle:** 22.5% retaliation, 240s duration, 800x army strength SE reward.

Retaliation chance increases by +5% per raid level completed. Plan for escalating risk as your raid level grows.

Strategies

- **Cautious:** 1.5x duration, 0.5x retaliation, 0.5x reward.
- **Standard:** 1.0x all.
- **Reckless:** 0.7x duration, 1.5x retaliation, 2.0x reward.

Last 25% — The Battle Unfolds

When 75% of raid time has elapsed, the outcome is pre-determined and the final phase begins. Dramatic messages appear in the raid tab describing the battle, and the live Casualty Ticker shows unit counts actively declining if you are taking losses. The activity bar drain also continues to show progress to zero.

Success

- Raid reward deposited. Raid level increases by 1.
- No cooldown on success.

Failure

- Soul Essence and Dark Mana set to 0.
- Army losses applied (all units lost by default).
- Undying Will (Tier 5 Grimoire): retain 50% of army on failure.
- Taunt of the Damned (Tier 3): retain 75% of army on failure.
- 120 second cooldown before next raid.

Narrative Raids

When pressing the Raid button, there is a 20% chance that an eligible narrative event intercepts the standard modal and presents a story-driven choice instead. Narrative raids offer unique rewards including Tomes of Sight and modified terms.

- **The Desperate Village** (Lv1+, 50K SE, 100 units): Accept tribute (easy, low reward) or slaughter all (risky, high reward).
- **The Rival Necromancer** (Lv5+, 150K SE, 300 units): Crush them (SE reward) or absorb their soul (free Tome of Sight).
- **The Holy Crusade** (Lv10+, 500K SE, 500 units): Three choices ranging from open battle to unleashing plague, trading retaliation risk for reward scale.

Narrative raids fire once per eligible event. After completion they no longer appear in the rotation.

Raid Skills

- Unyielding Horde (Tier 1): -1% retaliation per zombie.
- Chilling Grip (Tier 2): -2% retaliation per ghoul, max -20%.
- Bone Fortress (Tier 3): -5% retaliation per golem.
- Taunt of the Damned (Tier 3): +25% raid rewards, retain 75% army on failure.
- Sacrifice: Critical Dominion (Tier 3): +35% raid rewards, +10% retaliation.
- Undying Will (Tier 5): retain 50% army on failure.
- Tower Floor 4: -10% retaliation.

9. BOSS BATTLES

Unlocked when you master any Tier 2 Grimoire skill. Face the fifteen champions of Brooklynia one by one, then the Final Boss: Hope, the Eternal Flame. Each prestige unlocks one additional boss.

How Combat Works

Boss combat is entirely skill-button-driven. Your army does not attack automatically. You must actively use grimoire skills to deal damage. The boss attacks every 3 game ticks, dealing 2% of its maximum HP as damage to your army each time.

- **Player HP:** Zombies x50 + Ghouls x200 + Golems x500 + Wraiths x1000, minimum 1000.
- **Boss damage per attack:** $\text{floor}(\text{bossMaxHP} \times 0.02)$.
- **Skill damage:** Flat base damage from the skill + 10% of total army strength as bonus.
- **Defeat:** lose exactly 25% of your army. 5-minute retry cooldown.
- **Victory:** earn SE = $\text{baseHP} \times 2$, DM = $\text{baseHP} \times 0.5$, CM = $\text{baseHP} \times 0.1$.

Boss Scaling

Bosses scale in difficulty with both your progress through the roster and your grimoire prestige count. Later bosses are significantly tougher than early ones, and every prestige makes the entire roster harder. The Final Boss, Hope, is in a category of her own.

Boss Combat Skills

Each grimoire skill deals a fixed base amount of damage plus a bonus proportional to your total army strength. A larger army makes every skill hit harder. Each skill also has its own cooldown, so managing which skills to fire and when is the core of boss combat.

The Final Boss — Hope

Hope, the Eternal Flame, has a base HP of 2,000,000 and uses the 2.0x index multiplier. She is unlocked only by acquiring The Final Ascension (Tier 5 Grimoire skill), which itself requires Death's Dominance, Undying Will, and Transcendent Command first. Defeating Hope is the ultimate achievement of a prestige cycle.

Boss Unlock Progression

Each Grimoire Prestige unlocks one additional boss. Prestige 1 unlocks Captain Roderick Steele. Prestige 15 unlocks all regular bosses. The Final Boss is gated behind The Final Ascension skill regardless of prestige count.

Boss battles persist across ascensions but reset on Grimoire Prestige. Your defeated bosses list clears with each prestige.

10. GRIMOIRE PRESTIGE

The most significant progression system in Malakar's Descent. Grimoire Prestige resets most of your progress but permanently grants powerful skills that persist across all future runs. Each prestige makes every subsequent run faster and stronger.

How to Prestige

- Reach Level 20 through Dark Ascension.
- The game pauses automatically and the Grimoire modal opens.
- Spend your accumulated DM and CM to purchase grimoire skills.
- Press CONFIRM PRESTIGE to execute the reset and keep your chosen skills.

You cannot dismiss the Grimoire modal without confirming. The game remains paused until you prestige. This is intentional -- do not reach Level 20 unless you are ready to prestige.

What Resets on Prestige

- Everything that resets on Ascension, PLUS:
- Necromancy level resets to 1
- Permanent multiplier resets to 1.0
- Boss battle progress (defeated bosses list clears)
- Boss battle unlock status
- Current run statistics

What NEVER Resets on Prestige

- Grimoire skills (the whole point)
- Tomes and their caps
- The Black Tower (all floors remain)
- TUP and Dark Library upgrades
- Prestige count (each prestige unlocks one more boss)
- Lifetime statistics

The Skill Tree — Overview

The Grimoire has 5 tiers. Each tier requires owning at least 4 skills from the previous tier before any skills from the next tier can be purchased. Skills within a tier can be purchased in any order. Some skills conflict with each other and cannot be owned simultaneously.

- **Tier 1:** Frenzied Swarm, Unyielding Horde, Corpse Reavers, Sacrifice: Ravenous Spirit (conflicts with all others)
- **Tier 2:** Shadow Barrage, Chilling Grip, Bone Shredders, Sacrifice: Essence Channeling (conflicts with all others)
- **Tier 3:** Ironbound Titan, Bone Fortress, Taunt of the Damned, Sacrifice: Critical Dominion (conflicts with all others)
- **Tier 4:** Necrotic Synergy, Eternal Legion, Lord's Presence, Relentless Horde, Army of Darkness, Phantom Strike, Titanic Regeneration
- **Tier 5:** Death's Dominance, Undying Will, Transcendent Command, The Final Ascension (requires Deaths + Undying + Transcendent)

Sacrifice Skills

Each tier has one Sacrifice skill that conflicts with all other skills in that tier. Sacrifice skills provide powerful bonuses but permanently sacrifice one unit type, which can no longer be raised. Choose carefully.

- **Sacrifice: Ravenous Spirit (Tier 1):** +10% all SE. Zombies sacrificed permanently.
- **Sacrifice: Essence Channeling (Tier 2):** +20% DM. Ghouls sacrificed permanently.
- **Sacrifice: Critical Dominion (Tier 3):** +35% raid rewards, +10% retaliation. Golems sacrificed permanently.

You can own multiple Sacrifice skills across tiers. Many advanced builds sacrifice 2 or even 3 unit types for specialised bonuses.

Prestige Strategy

- First prestige: prioritise Unyielding Horde or Corpse Reavers for quality-of-life, then get 4 Tier 1 skills to unlock Tier 2.
- Second prestige: get Eternal Legion (Tier 4) as early as possible -- keeping your army through ascensions is transformative.
- Third prestige onwards: work toward Transcendent Command (+50% all caps) and then The Final Ascension.

DM and CM accumulate between Level 20 attempts. You can earn hundreds of DM across multiple ascensions before prestiging.

11. QUESTS

Quests track lifetime statistics and award TUP upon completion. They are checked every 10 game ticks. When a quest becomes claimable, a QUEST READY message appears in the event log. Claim rewards from the Quests tab.

Quest completion is permanent and persists across all ascensions and prestiges. Once claimed, a quest cannot be claimed again.

The full quest list is visible in the Quests tab. Completed quests are tracked permanently across all runs.

12. STATS TAB

The Stats tab provides a comprehensive readout of your current run, live production rates, lifetime totals, and curse cast history. It refreshes each time you open the tab.

Current Run

- SE / DM / CM earned since last Ascension or Prestige.
- Units Raised (run): individual counts for Zombies, Ghouls, and Golems.
- Units Lost (run): total army losses from raids and boss defeats this run.

Production

- SE / tick: your current Soul Essence generation per 90-second tick, including all multipliers.
- DM / tick: Dark Mana generation including tomes, study bonus, tower bonuses, and active curses.
- CM / tick: deterministic Corpse Matter generation. Does not include probabilistic rolls (2% base, Corpse Reavers, Tower Floor 3).
- Ascension Multiplier: your current permanent SE multiplier ($\times 1.0 + 0.1$ per ascension level).
- Next Ascension Cost: exact SE required for your next Dark Ascension.

Lifetime

Cumulative totals across all runs, ascensions, and prestiges. These numbers never reset. Includes all resource earnings, all units ever raised, and all progression milestones.

Curses Cast

Lifetime cast counts for each of the three curses: Feast of Souls, Corpse Gratification, and Ruinous Ambition. A small badge of honour for devoted necromancers.

13. STRATEGY GUIDE

Early Game (Levels 1-5)

- Raise zombies immediately. Never let SE sit idle.
- Buy Tome of Sight at 250 DM -- this is your most important purchase. Do it before anything else.
- Study every time you have 50 DM to spare. Each study compounds permanently.
- Buy Tome of Binding at 100 DM after your first Tome of Sight.
- Aim for 10+ Tomes of Sight before your first ascension.
- First ascension is at 1M SE. Do not rush it -- more tomes before ascending means more DM income on the next run.

Mid Game (Levels 5-15)

- Expand ghoul count. At 5 SE/tick each, ghouls outpace zombies per unit slot.
- Begin saving for golems (1000 SE + 50 DM each). Their 20 SE/tick plus 0.01 CM/tick make them essential.
- Build Tower Floor 1 as soon as you hit the army requirements (10Z, 2G, 1 Golem).
- Build Floor 2 at Level 3 -- the +10% DM accelerates everything.
- Start collecting CM for your first Grimoire Prestige. Target 4 Tier 1 skills minimum.
- Unlock raids at Level 10. Target Graveyard first for CM income.

Late Game (Levels 15-20)

- Stack Tomes aggressively. Getting both caps to 75 before Level 20 is ideal.
- Accumulate enough DM/CM to buy at least 8 Grimoire skills during your first prestige window.
- Build all 5 Tower Floors before your first prestige -- they persist forever.
- Target Eternal Legion (Tier 4) on your second prestige -- keeping your army through ascensions removes the biggest mid-run bottleneck.

Prestige Cycle Optimization

- After your first prestige, runs get dramatically shorter due to persisting tomes and tower.
- Each prestige unlocks one more boss. Prioritise boss defeats for TUP income.
- By prestige 3-4, focus on reaching Transcendent Command for the +50% all-caps bonus.
- The Final Ascension skill is the endgame gate -- requires Deaths Dominance + Undying Will + Transcendent Command.

Corpse Matter Tips

- CM is the bottleneck for grimoire progression. Never waste it.
- Corpse Reavers (Tier 1) gives 15% chance per tick for +1 CM -- strongest early CM skill.
- Use Corpse Gratification every cooldown cycle.
- High golem counts with Bone Fortress or Titanic Regeneration are the primary late-game CM engine.

APPENDIX A — Grimoire Skills Full Reference

Skill Passive Effects

Skill	Tier	Cost DM/CM	Effect	Conflicts
Frenzied Swarm	1	250 / 25	3% chance/tick: zombies attack twice (SE x2)	Sacrifice: Ravenous
Unyielding Horde	1	300 / 30	-1% retaliation per zombie in raids. +25% zombie cap	Sacrifice: Ravenous
Corpse Reavers	1	200 / 20	15% chance/tick: +1 CM	Sacrifice: Ravenous
Sacrifice: Ravenous	1	150 / 15	+10% all SE. Cannot raise zombies	All other Tier 1
Shadow Barrage	2	500 / 50	Every 5th tick: ghouls deal double SE	Sacrifice: Essence
Chilling Grip	2	600 / 60	-2% retaliation per ghoul, max -20%	Sacrifice: Essence
Bone Shredders	2	450 / 45	5% chance/tick: ghouls produce +5 DM	Sacrifice: Essence
Sacrifice: Essence	2	400 / 40	+20% DM generation. Cannot raise ghouls	All other Tier 2
Ironbound Titan	3	800 / 80	+50% golem SE when SE >= 80% ascension cost	Sacrifice: Critical
Bone Fortress	3	900 / 90	Golems +1 CM/tick. -5% retaliation per golem	Sacrifice: Critical
Taunt of the Damned	3	700 / 70	+25% raid rewards. 75% army retained on fail	Sacrifice: Critical
Sacrifice: Critical	3	650 / 65	+35% raid rewards, +10% retaliation. No golems	All other Tier 3
Necrotic Synergy	4	1500 / 150	+5% SE per active unit type (max +20%)	None
Eternal Legion	4	2000 / 200	Army survives Dark Ascension	None
Lord's Presence	4	1800 / 180	+25% SE when any unit type >= 90% cap	None
Relentless Horde	4	1200 / 120	+0.5 SE/zombie/tick. +25% zombie cap	None
Army of Darkness	4	3000 / 300	Unlock Wraiths (5k SE + 100 DM each)	None
Phantom Strike	4	1600 / 160	10% chance/tick: ghouls produce triple SE	None
Titanic Regeneration	4	2200 / 220	Golems +2 CM/tick. Restore 1% army/tick	None
Death's Dominance	5	2500 / 250	+1% SE per necromancy level	None
Undying Will	5	3000 / 300	Retain 50% army on raid/boss defeat	None
Transcendent Command	5	4000 / 400	+50% ALL unit caps permanently	None
The Final Ascension	5	5000 / 500	Unlocks Final Boss: Hope	Requires D+U+T

Boss Combat Skill Damage Values

When used in boss combat: Damage = base + floor(armyStrength x 0.1)

Skill	Base Damage	Cooldown (ticks)
Frenzied Swarm	500	8
Shadow Barrage	1,200	12
Ironbound Titan	2,000	15

Necrotic Synergy	3,000	18
Death's Dominance	4,500	20
Phantom Strike	2,500	14
Bone Fortress	1,800	16
Undying Will	3,500	22
Chilling Grip	1,500	12
Unyielding Horde	800	10
Taunt of the Damned	2,200	18
Transcendent Command	5,000	25
The Final Ascension	8,000	30
Army of Darkness	4,000	22
Lord's Presence	3,200	20

APPENDIX B — Tower Floors Reference

Floor	Name	Lv Gate	Cost	Army Req.	Build Time	Fail %	Bonus
1	Obsidian Foundation	1	1K SE / 50 DM / 10 CM	10Z 2G 1Gol	90s	15%	+5% SE
2	Shadowed Vaults	3	2.5K SE / 100 DM / 25 CM	20Z 5G 2Gol	150s	20%	+10% DM
3	Ebon Spire	6	5K SE / 150 DM / 40 CM	35Z 8G 3Gol	240s	25%	5% CM/tick
4	Battlements of Night	8	10K SE / 200 DM / 60 CM	50Z 10G 4Gol	360s	30%	-10% raid ret.
5	The Black Pinnacle	10	25K SE / 300 DM / 100 CM	75Z 15G 5Gol	480s	35%	+10% ALL

Failure chance reduces by 1% per 10% excess army above requirement, minimum 5%. All floors are permanent and survive all resets.

APPENDIX C — Raid Targets & Narrative Events

Standard Raid Targets

Target	Base Ret.	Duration	Reward Type	Reward Mult	Notes
Village	4.5%	90s	SE	300x	
Graveyard	2.7%	60s	CM	20x	+5 to 14 bonus zombies
Monastery	13.5%	120s	DM	150x	
Castle	22.5%	240s	SE	800x	High risk, high reward

Retaliation increases by +5% per raid level. Strategy multipliers apply: Cautious x0.5, Standard x1.0, Reckless x1.5 to retaliation; Reckless x2.0 reward.

Narrative Raids

Event	Min Level	Min SE	Min Units	Choices
The Desperate Village	1	50,000	100	Accept Tribute (30s, 0% ret) OR Slaughter All (120s, 15% ret, 4x reward)
The Rival Necromancer	5	150,000	300	Crush Them (180s, 5% ret, 500x SE) OR Absorb Soul (300s, 0% ret, +1 Tom)
The Holy Crusade	10	500,000	500	Battle (480s, 35%) / Raise Dead (240s, 15%) / Unleash Plague (600s, 50%, 2

Narrative raids have a 20% chance to appear when eligible. Each fires only once per account.
